

Working towards bovine TB free status in England

Edge Area	
Type of Measure	Current Measures
1	Slaughterhouse surveillance Annual herd testing or six monthly herd testing Compulsory pre-movement testing
2	Resolving infected herds includes movement restrictions, isolation, slaughter and compensation, epidemiological investigation, tracing, additional skin tests and IFNy blood testing Additional skin testing in neighbouring herds Additional skin testing in herds within 3km radius (only in annual herd testing areas)
3	Badger Edge Vaccination Scheme- Licensed injectable badger vaccination Licensed badger culling
4	Biosecurity measures Risk-based trading

Low Risk Area	
Type of Measure	Current Measures
1	Slaughterhouse surveillance Four-yearly herd testing (Annual testing for high risk herds) Pre-sale check tests Compulsory post-movement testing of cattle from annual (or more frequent) surveillance testing
2	Resolving infected herds includes movement restrictions, isolation, slaughter and compensation, epidemiological investigation, tracing, additional skin tests and IFNy blood testing Additional skin testing in herds within 3km radius
4	Biosecurity measures Risk-based trading

High Risk Area	
Type of Measure	Current Measures
1	Slaughterhouse surveillance Annual herd testing Compulsory pre-movement testing
2	Resolving infected herds includes movement restrictions, isolation, slaughter and compensation, epidemiological investigation, tracing, additional skin tests and IFNy blood testing Additional skin testing in neighbouring herds
3	Licensed injectable badger vaccination Licensed badger culling
4	Biosecurity measures Risk-based trading

- 1 Surveillance
- 2 Breakdown management
- 3 Reduce risk of TB from badgers
- 4 Other disease prevention

■ Low Risk Area
 ■ Edge Area (annual testing)
 Edge Area (six monthly testing)
 ■ High Risk Area
